Professional Experience

Logitix

Software Engineer | 📍 Remote | August 2019 ~ Now

- Working on a Vue front-end project, aiming to solve current pains and create new and better processes to manage ticket sales and brokerage;
- Automating of previously manual processes with Selenium, improving speed and scalability;

SIGE Cloud

Software Developer | 📍 Brazil | July 2017 ~ July 2019

- Successfully applying the Microfrontends approach to redesign and modernize a legacy product;
- Big part on planning and developing a simplified ERP software focused on small companies, built from scratch;
- Development of a mobile app that acts as an extension to the company's main product;
- Development of an internal HelpDesk software, including the creation and execution of support tickets, as well as the creation of reports and views of general data;
- Partial automation of the HelpDesk system, utilizing Machine Learning to reduce the amount of opened tickets by over 10%;

Promob Software Solutions

Software Developer | 📍 Brazil | September 2014 ~ June 2017

- Maintenance and modernization of the company's services portal;
- Development and maintenance of many APIs used by other development teams;
- Refactoring of the company's internal software structure, according to changes in the business model;
- Integration with third-party CRM, HelpDesk and ERP softwares;

About

I have a passion for building fast, responsive and pretty UIs, bringing great designs to reality and improving them as they get built. I love learning new things and applying them in practical solutions, either improving existing services or building completely new ones.

Skills

Front-end

Angular	Vue	TypeScript
JavaScript	UX	SASS
Ionic	Electron	PWAs

Back-end

C#	.NET	NodeJS
MongoDB	SQL Server	LiteDB

Education

Graduated as a Technologist in System Analysis and Development at Centro Universitário da Serra Gaúcha, 2018.
